The speed of paperwork and background checks directly impacts how quickly the fee assistance can be processed and this impacts your employer's family budget. You can make a big difference for the family by completing the paperwork quickly and accurately. Ask questions and triple check all documents.

Whether you are an experienced in-home provider or new to the role, you can make a big difference in supporting your employer's family goals! This is a new fee assistance, and everyone is learning. Ask questions of the CCYH team and triple check any paperwork before submitting.
Fast, accurate paperwork = less fee assistance delays.

Keep in mind this is a pilot program & you and your employer are on the same team. This is the first-time military families can apply for a fee assistance when hiring an in-home provider or a nanny and your patience and willingness to participate makes a huge difference! Your voice matters as the pilot program grows.

Quarterly visits to the home where you are working is a requirement of the pilot program but don't stress about it! Your employer will receive a list of what the team is looking for during their visit. Your job is to keep taking great care of the child(ren). Ask your employer to review the paperwork with you before the visit.
